

The logs are about 6" in diameter and 12" tall.

A 10" or 12" standard pot will work.

Pack some soil under and around the log, make sure not to damage the bark. You should have place the log vertically, with about 2" above the soil line.

no sun

no drafts.

2 Wks
let soil dry nearly completely
between watering.

Once potted, place in a location that get no sun or drafts.

Water every couple of weeks.

It's best to let the soil dry out nearly completely between watering.
